

DRAWING LESSONS FROM THE ENVIRONMENT

Power Generation Leader Senoko Power Increases Students' Awareness On Environmental Issues Through Drawing Competition

Singapore, 31 March, 2005 – Senoko Power Limited, the leading electricity power generation and retail company in Singapore, today presents awards to the winning schools and students in the Festive Card Design Competition based on the environment.

The award ceremony takes place at Senoko Power Station, where Senoko Power also celebrates a number of environmental milestones. The awards are being presented by Mr Tharman Shanmugaratnam, Minister for Education.

Aimed at broadening students' horizons outside classroom learning, the competition was introduced by Senoko Power in October last year to create greater awareness on the environment among primary school students.

The competition was open to schools in Senoko Power's immediate neighbourhood, which comprises Woodlands, Sembawang and Yishun. The winning drawings will be featured in Senoko Power's 2005 annual report, corporate calendars and diaries.

Winning schools will each receive a trophy and a voucher, while each student winner will be given a certificate and book voucher.

Mr Roy Adair, President & Chief Executive Officer of Senoko Power, said: "Senoko Power hopes that by organising an educational and fun-filled event like the festive card design competition, students can learn about a wide variety of environmental issues."

"We were very impressed by the quality of the response that we received from participating schools. The drawings showed that even at primary school level, the students have an excellent grasp of the importance of looking after the environment. It bodes well for the future of Singapore," Mr Adair added.

About Senoko Power Limited

Senoko Power is the largest power generation company in Singapore, providing over 30% of the nation's electricity needs.

Senoko Power is the first power generation company in Singapore to import clean natural gas for power generation in 1992, launch the first combined cycle plant in 1996 and was certified to ISO 9000 in 1998, OHSAS 18001 in 2003 and ISO 14001 in 2004.

Senoko Power has a combined installed capacity of 3,390 megawatt (MW), comprising 1,250 MW of thermal plants, 1,930MW of combined cycle plants (CCPs) and 210 MW of fast-start gas turbines. Senoko Power owns and operates Senoko Power Station and Pasir Panjang Gas Turbine Station. Senoko Power is wholly - owned by Temasek Holdings (Private) Limited.

About Senoko Energy Supply (SES)

Embracing the rapid deregulation and liberalisation of the Singapore electricity market, Senoko Power Ltd established its wholly-owned retail subsidiary, Senoko Energy Supply Pte Ltd., to retail electricity direct to major customers. SES obtained a Public Supply License from the Energy Market Authority (EMA) in February 2001 and is the first energy retail company to be certified ISO 9000 in 2002. SES is also the largest electricity retailer in the contestable market.
