

Clean and Green

Clean and Green, Clean and Green
Keep our Planet Clean and Green

Generation of waste we have to trim
Switch off excessive lights or make them dim
Let us reuse and recycle every single ream
Keep our Planet Clean and Green

Depleting ozone layer is damaging our skin
Global warming situation is extremely grim
Let us work together as a united team
Keep our Planet Clean and Green

Reforest our planet and minimize our sin
Conserve and reclaim every drop of stream
Let us educate and train every human being
Keep our Planet Clean and Green

War against climate change we have to win
This crucial message every heart needs to sing
Let us make every effort to fulfill our dream
Keep our Planet Clean and Green

Deepak L. Waikar (dlwaikar@yahoo.com)

Dr. Deepak Waikar is Engineering Educator, Researcher, Author and supports green movement, energy efficiency and clean energy initiatives.
